How To Clean Your Dogs Ears With BambooStick®

1. Secure the dogs head and put a small amount of cleansing liquid into the ear canal.

2. Massage the base of the auditory canal. If possible, let the dog shake its head.

3. Use the BambooStick® to absorb the remaining liquid and to eliminate the secretions and dirt matted on the pinna and in the auditory canal.

Tips to remember

Some dogs, because of their temperament, or simply because of the pain caused by ear infection, cannot bear having their ears cleaned. If this is the case, do not persist. Consult your vet for advice instead.
