

LIGHT THE WAY...

With Leading Light Technology

RIMSA

PRIMA-FLEX/PRIMA-FIX Exam Light

The ALFA examination lights provide 3 independent LED light sources, which reduces shadows and produces a deep cylindrical light, with highly reduced heat irradiation.

105,000 Lux @ 0.5m

PRIMA is a concentration of unparalleled-performance technology, the best for an examination light. The light optics have been designed to provide focused and deep lighting. The PRIMA examination lights are available in two styles. PRIMA-FLEX has a flexible arm and PRIMA-FIX has a fixed arm.

DIRECT LIGHT

Features:

- The round and ultra-flat shape of the light head makes the product ergonomic and suitable for even small practices
- The radial layout of the lenses and the large reflector diameter permit shadow suppression and three-dimensional light
- By simply pressing the digital key on the membrane keyboard, it is possible to choose between two different white light temperatures: 4.000K - 4.500K without altering the light intensity
- The light intensity can be adjusted in six different steps
- The first ever examination light to integrate an ambient light option as well as the traditional concentrated light
- Battery pack available
- Base/fixing to be purchased separately (table clamp, wall mount & mobile base)
